Issued patents

Applications

Decontamination of contaminated streams

US Pat. 4775650 - Filed Jan 13, 1987 - Louisiana State University

... **toxin**-polluted streams, and to a process for the decon- ... or compounds, as

a be used to catalyze almost any **chemical** reaction, with- toxic **impurity**. ...

Apparatus for producing high-purity water

US Pat. 4089749 - Filed Mar 29, 1976 - The United States of America as represented by the Department of Health, Education and Welfare

Ideally, distillation should give water of the highest A primary source of

contamination produced by an purity, since the process of purification ...

[APPLICATION] Chromatographic method and system for purifying a botulinum toxin

US Pat. 11452570 - Filed Jun 14, 2006 - ALLERGAN, INC.

The choice of matrix determines the type of **chemical** characteristic on ... a solvent (the eluant) containing a charged **substance** (usually salt ions) that ...

Determination of multi-valent metal contamination and system for removal of ...

US Pat. 6770483 - Filed Dec 15, 2000

These potent toxins can cause **chemical** changes in cellular DNA, ie, mutations,

... The presence of Cr+6 is not only recognized as a toxic **substance**, ...

Acidic solution of sparingly-soluble group IIA complexes

US Pat. 6902753 - Filed Feb 9, 2000 - Mionix Corporation

Toxin is a noxious or poisonous **substance** that: (1) is an integral part of the

... Endotoxins are the major cause of **contamination** in food products, ...

HYDROPHILIC BASE THERAPEUTIC COMPOSITION

US Pat. 2919230 - Filed Oct 29, 1953

It is also necessary that any in- ence of or **contamination** with some foreign material. ibitor which may have been present in the monomeric Changes in pH of

...

Photoactivation of proteins for conjugation purposes

US Pat. 6313274 - Filed May 25, 1995

20 **Chemical** reducing agents are difficult to handle due to their ... converted

to the active drug or **toxin** by photochemical cleavage of a bridging group. ...

... New composition, use and method

substance or chemical or toxin and contamin
